

## Installer Certification

We are seeking detail oriented individuals to become NomadISP Certified Installers. As a certified installer you will be provided with opportunities to install our equipment at pre-sold venues in the areas you elect to cover. This is a great opportunity to collaborate with the fastest growing wireless internet service providers in the industry.

We currently offer two levels of certification. Both levels give you access to our dealer network portal, a tool that informs you when installations become available in your area and the specifics for each installation. Platinum level installers, those individuals who have attended one of our hands-on training sessions, are given preference on installation in their selected territories. Platinum level installers may also earn commissions up to 10% on new business referrals.

### Steps to become a NomadISP Certified Installer

1. Complete our online training program
2. Pass our multiple choice certification exam
3. Register as a dealer

### Steps to become a Platinum Level NomadISP Certified Installer

1. Complete our online training program
2. Pass our multiple choice certification exam
3. Attend a hands-on training session (see upcoming training sessions)
